

Asbestos Waste Storage Box

All asbestos waste is defined as 'hazardous waste' in England and Wales and as 'special waste' in Scotland when it contains more than 0.1% asbestos. The corresponding waste legislation is therefore subject to enforcement by the Environment Agency, Natural Resources Wales and the Scottish Environment Protection Agency, as the case may be.

Waste containing asbestos must be consigned under the relevant waste rules which include a "duty of care". That duty of care means, amongst other things, that duty holders prevent escape of the waste whilst it is in their control. All movements must be accompanied by a hazardous/special waste consignment note. The Control of Asbestos Regulations 2012 (CAR2012) apply.

The SMH Asbestos Waste Storage (AWS) is the perfect solution for transporting ACM's. It is an airtight secure containment box constructed from GRP panels.

Suitable for a wide variety of vehicles, the AWS can be adapted to any size requirements.

At a glance

- Available to buy
- Conforms to all relevant British Standards
- Sturdy and airtight, with a robust locking system
- GRP housing which is easy to clean
- Bespoke sizes
- Viewing window
- Servicing and repairs available from your local SMH branch
