

# WSM Needles & Accessories

## Wet Strip Machine

SMH's Wet Strip Machine (WSM) needles are specially designed to work with our WSM units. These accompanying needles offer quick release fittings for a quick and easy set up, with a built-in flow control valve. These are available in 2" Straight, 4" Angled, and 6" Angled variations, allowing the needles to penetrate a range of depths suited for the job.

Needles come in strings of either 10, 25, or 50, with 300mm of tubing between each needle, and 5m on one end to connect to the WSM Control Manifold. All needle strings are supplied in a robust plastic storage box for transportation.

Each needle string is calibrated to meet the requirements of BS EN 8520-1:2009 to ensure that there is an even flow of liquid across all needle outputs, and a calibration certificate is issued with each set.

### At a glance

- All units comply with BS EN 8520-1:2009 Equipment used in the controlled removal of asbestos containing materials - controlled wetting equipment.
- The units are manufactured at an ISO 9001 quality assured site.
- Robust ABS casing in a bright red colour for quick identification of needles on job site.
- Self-regulating function to ensure an even flow of liquid across all needle outputs.

### Specifications

Case	Case material	ABS	
Case	Case colour	Red	
Flow	Flow control valve	✓	
	Standard flow rate (mL/min) ±10% Per needle	33	
	Half flow rate (mL/min) ±10% Per needle	16.5	
	Time to empty full (150L) tank (min)	Std.	Half
- 50 needles	90	180	
- 25 needles	180	360	
- 10 needles	450	900
